Re: Replacement vehicle purchase

---

Per the vehicle replacement schedule, the Parks 2017 Ford Transit 150 van (vehicle #42 with a VIN# 1FMZK1YMXHKB57884), was identified to be replaced this year. It was budgeted for as part of the 2024 G.O. bond issue. Proposals for a replacement vehicle were sent out to three local Ford dealers and two proposals were received for a 2025 Ford Explorer Active.

The proposals are for the same specifications except that the proposal from Bosak Ford includes seating for six instead of seven and doesn't include floor liners. The prices also include credit for trading in the existing Ford Transit van as part of this purchase.

Dealer	Cost	Trade-in credit	Purchase Price
Bosak Ford, Burns Harbor, IN	\$46,359	\$25,000	\$21,359
Paul Heuring Ford, Hobart, IN	\$46,671	\$25,000	\$21,671
Sutton Ford, Matteson, IN	No proposal		

**Recommendation:**

Staff recommends awarding the purchase of the replacement vehicle from Bosak Ford at a cost of \$21,359 after the trade-in of the existing van.

Re: Vehicle Proposal 02/10/2025

---

Dear MARK,

The unit I'm quoting is an in-stock vehicle. Please review the specs to make sure you are aware of the differences between what was asked for on the RFP and what is actually on our unit. The unit I'm offering has 2nd row captains chairs and does not have floor liners. It does have 20" carbon gray painted 10 spoke aluminum wheels and the Active Comfort Package. Color is Carbonized Gray Metallic with Space Gray Active seats. I can hold the unit until 2/18/25. After that, the vehicle will be available for sale. The trade appraisal of \$25,000 is good until 2/28/25. If a decision is made to accept our quote after 2/18/25 and the vehicle we are holding is sold, we we do what we can to acquire a like vehicle acceptable to the Town.

Thanks as always,

**Don Hadley**

## Vehicle Dimension and Performance Summary

Performance predictions in this report represent an estimate of vehicle performance based on standard operating conditions. Variations in customer equipment, load configuration, ambient conditions, and/or operator driving techniques can cause significant variations in vehicle performance. These values are not representative of results that may be shown in actual dynamometer tests. This report should therefore be used as a guide for comparative vehicle performance.
